

Hex Pegs Short Hook Top Drillable Tent Peg

\$11.00

Details

If the longer version is a bit of overkill for your needs but you still want to save time and energy when setting or packing up your camp, then Hex Peg's Short Hook Top Pegs are the answer. Made from the same high-quality steel as the original Hook Peg, these shorter ones have been designed for those times when you drill into super hard ground but you just can't get a long one all the way in. With a shaft diameter of 10mm and a total length of 172mm, these pegs can be used with most types of drill or impact drivers. The hook attachment is securely welded to the stainless-steel washer and allows you to secure your guy ropes with ease. This top area is protected by the rubber grommet and the threaded body ensures your peg will stay in place the way you need. Whether you're heading across the Nullarbor, into the Flinders Ranges or pitching on any other rocky terrain, you can rely on the Short Hook Top Pegs from Hex Peg to do the job. High-quality steel Strong enough to be drilled into most ground surfaces Can be inserted and removed in seconds Compatible with electric and cordless drills and impact drivers Stainless-steel washer with a hook attachment for guy ropes Secures tents, annexes and all types of temporary shelters Lifetime warranty
